Personal Summary

Highly focused and responsible individual with a track record of academic and extracurricular success. Extensive leadership experience, particularly with events planning and project execution in a team. Currently looking for a software developer internship role but also open to new opportunities related to the IT department. Guaranteed to contribute strongly to any job role that requires passion, adaptiveness, creativity, and exemplary work ethics. Aspiring to excel in Information Technology on a more advanced level and build my career pathway in this industry.

Work Experience

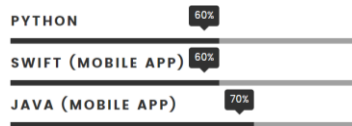

MAR 2017 – JUN 2017

The Brainer Code | Instructor

The Brainer Code is the provider for experiential robotics enrichment programs for students aged 4 to 16. Assisted students in their activities, like coding and building of the robots. Software used in the lessons were Scratch and EV3, to build their foundation in coding from young. Also guided students in the National Robotics Competition, coming up with creative yet simple solutions for the challenge statement.

Skills

Languages

Written and Spoken English; Written and Spoken Mandarin

Others

Certificate from Institute of Health Sciences: Certified First-Aider

Strengths

Computer Skills

Creation of Mobile applications using Swift or Java. Code necessary software for clients, using C#, C++ or Python. Able to do WEB Development using HTML, CSS, Javascript and jQuery.

Leadership & Teamwork

Making informed decisions and thinking logically. Promoting collaborative spirit by seeking opinions.
